Radar Speed Display Signs Manufacturing & Sales

RU2 Fast 350/360

Pole Mount Radar Speed Display Signs

RU2 Systems has your pole mount traffic calming needs covered with our unique pole mount radar speed display signs. Mounted permanently or semi-permanently, these high intensity LED displays get the attention of oncoming drivers. The signs can be directly hard-wired to your electric service or optionally powered by a solar power system.

Each of these designs feature a full matrix high intensity LED display with 18" characters. This larger 18" character is appropriate for higher posted speeds (35 MPH+) and any longer line-of-sight locations where speeding is a problem.

Standard configuration includes:

- 1) Minimum show speed
- 2) Maximum show speed (blinking)
- 3) Flashing Digit Violator Alert
- 4) Automatic intensity adjustment to ambient light and,
- 5) Single cycle 24 hour ON/OFF clock

Several Violator Alerts are available including an embedded "SLOW DOWN" message, our unique flashing Red/Blue bars, particularly effective at night and high intensity white LED strobe. In addition, various 3rd party timing apparatus can be provided.

The closely related RU2 Fast 360 features two and one-half 18" full matrix characters for KPH and racing applications. The leading "One" digit allows for readings up to 199.
