Radar Speed Display Signs Manufacturing & Sales

RU2 Fast 950 Radar Speed Display Trailer

The RU2 Fast 950 Radar Speed Display Trailer has a 18" tall character display which, when raised into full operating position, stands 7 feet tall, easily seen by oncoming drivers. The display folds down, creating a lower trailer profile for easy transport and storage. The display raises and lowers with the aid of an electric actuator for quick setup.

Optional features include our violator alert systems, solar panel, and an alarm system. Also available is our RU2 Systems Data Acquisition Package which records the time, date and speed on oncoming vehicles without the use of cumbersome pneumatic tubes placed across the street. The data system can also be collected in "stealth" mode. No speeds are displayed, so it appears the sign is off so normal traffic patterns can be recorded.

RU2 Systems, Inc. has the right signs and trailers to help you succeed with your traffic calming efforts!
